POOKT PET
WASTE SOLUTIONS INC.

MUNICIPAL PET-WASTE SERVICES | LOWER MAINLAND

Cleaner parks.
Measurable diversion.
One accountable partner.

A proposed managed service combining dedicated collection, planned centralized Series 77 processing, auditable reporting and a target park-bench material pathway.

COLLECT LOCALLY | PROCESS CENTRALLY | BUILD VALUE

START WITH A PAID MUNICIPAL PILOT

Identify priority sites, establish the current-service baseline and generate council-ready evidence before any decision to scale.

01

Cleaner public spaces

Dedicated service that supports park standards and resident experience.

02

Predictable operations

Defined routes, service levels, escalation and accountability.

03

Decision-ready evidence

Monthly KPIs for staff evaluation, procurement design and council reporting.

REQUEST A PROCUREMENT-ALIGNED PILOT SCOPE

A focused discussion can define candidate public spaces, baseline measures, service levels, reporting requirements and the required procurement pathway.

POOKT PET WASTE SOLUTIONS INC.

THE GOAL: PARK BIN TO PARK BENCH.

A proposed central processing model designed around municipal outcomes: clean sites, reliable collection, controlled handling, verified reporting and a target pathway for qualified park-bench components.

PLANNED CENTRALIZED SERIES 77 SYSTEM

Proposed off-site processing; municipalities purchase verified service outcomes rather than processing equipment.

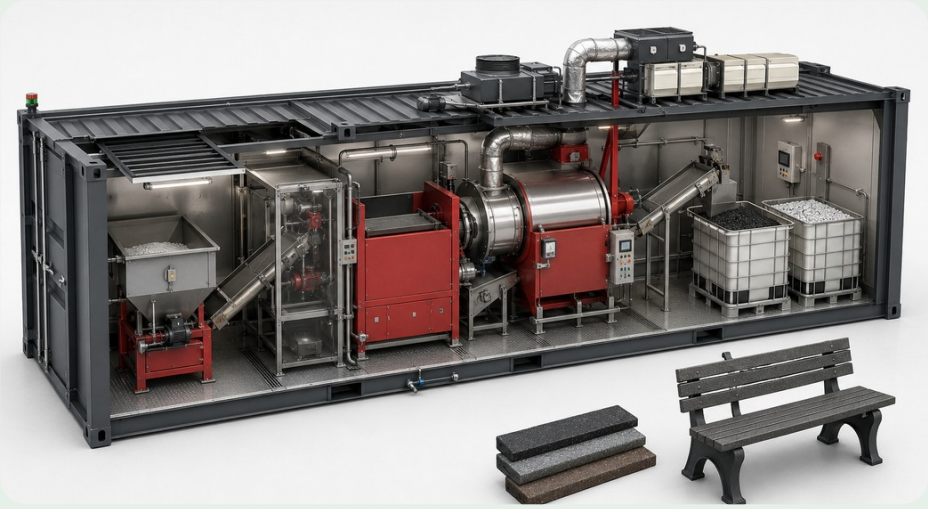

Image is for illustrative purposes. Proprietary processor is not exactly as shown.

Process steps and outputs are subject to commissioning, permitting and validation.

01 RECEIVE
Secure delivery and logged input

02 PREPARE
Bag-management and feed preparation

03 PROCESS
Treatment under validated operating parameters

04 VERIFY
Mass balance and output-quality testing

05 RECOVER
Target use in qualified park-bench components

MUNICIPALITIES PURCHASE OUTCOMES - NOT MACHINERY

- **Site and route design**
  Baseline audit, candidate sites, receptacles, service frequencies and seasonal response.
- **Managed field service**
  Scheduled lifts, container hygiene, documented chain of custody and defined backup response.
- **Planned regional processing**
  Consolidation at the proposed regional hub, subject to commissioning, permits and approved protocols.
- **Council-ready reporting**
  Kilograms by site, contamination, service exceptions, complaints, verified destination and recovery results.

PROPOSED PAID MUNICIPAL PILOT **6-month initial term | 10-20 priority sites**

Optional 6-month extension for full seasonal validation

Baseline audit | scheduled service + peak response | monthly KPI dashboard | scale and procurement recommendation

LET'S SCOPE A PILOT YOUR STAFF CAN EVALUATE.
